THE HOME OF

Archias' Sure Seeds

FOUNDED 1884.

INCORPORATED 1905.

SEDALIA, Mo., JANUARY 1, 1909.

DEAR READER:

In presenting you with our 1909 Garden Annual we wish to announce, in a modest way, the completion of *our 25th year* in the seed business. For twenty-five years we have served the American people with the *very best* seeds and supplies and our business is continually growing. Last season we witnessed the largest business we have ever had, for which we are *extremely grateful to our friends and patrons*, for through their kind efforts we have added many new friends to our large list.

Finding our quarters too small to accommodate the rapid growth of our business, we have just completed an addition to our warehouse, which gives us *nearly 5000 feet more floor space*, with all modern improvements for handling "Sure Seeds" and Supplies, and one of the most complete and up-to-date Seed and Supply Establishments in the United States.

While on our European trip the past season, visiting the most noted foreign seed and bulb growers, we secured many valuable selections in seeds, which in addition to our American Grown crops enables us to offer you *the cream of the Best Seeds Grown at moderate prices*.

Believing that the *recollection of quality remains long after the price is forgotten* we never attempt to compete with "Cheap John" houses. Our customers may depend on receiving the best that money can buy.

Our catalogue is full of bargains in good things for the Farmer, Gardener, Poultryman and Bee-keeper, however, if you do not find what you want or if there is anything not satisfactory, write us, be friendly, and we will do our utmost to please you.

We extend you a sincere and cordial greeting and wish you a *Happy and Prosperous New Year*.

Most sincerely yours,

L. H. ARCHIAS, PRESIDENT
L. A. KIPPING, VICE-PRESIDENT
L. ARCHIAS, SECRETARY

Archias' Seed Store Corp.

ARCHIAS MAMMOTH TREE TOMATO

ARCHIAS' MAMMOTH TREE

GREATEST WONDER OF THE AGE.

Thousands of our friends have planted Archias' Mammoth Tree Tomato for over fifteen years and it is more popular today than any other variety, especially to the family gardener.

Fruit is of mammoth size, flesh very thick, excellent flavor, ripens well up to the stem, color, dark red, tough skin. Bears well throughout entire summer, holding its large size during severe drouth, while other varieties are dried up. It continues to bear its fruit with the greatest vigor until killed by the frost. Shape round and smooth. The yield of this Tomato is simply enormous, one bushel having been picked off a single plant in one picking. Well cultivated plants have attained the height of ten feet and nine feet across. This should not be classed with other so-called tree tomatoes of some houses, as it is the only genuine tomato of the kind now existing. Price: 10c per pkt; 3 pkts., 25c; oz., 40c, by mail, postpaid. OUT YIELDS ALL OTHERS! OUT SELLS ALL OTHERS! DELICIOUS FLAVOR! SOLID MEAT!

We have hundreds of letters that space will not admit, praising this wonderful tomato.

TREE AND HEDGE SEEDS.

It is said that in twenty-five years our forests will be virtually, if not fully, exterminated for commercial uses. America is on the eve of a forest famine. This is inevitable. Hence forestry or tree growing for profit must and will become an industry in this country, the same as wheat and alfalfa. The end is near, and soon 100,000,000 people in a timberless land will be appealing to 40,000 empty, idle mills for 50,000,000,000 feet of lumber annually.

If the above paragraph is true, and it undoubtedly is, every citizen of the United States should take a personal interest in this problem.

What can you as an individual do?

ANSWER.

If every land owner will seek his or her best interests, it will be but a few years until the re-forestation of our beautiful country will have been accomplished.

General Rule—Plant tree seeds in early spring in drills about two ft. apart; cover $\frac{1}{4}$ inch or more in depth, according to size of seed; keep them from drying out.

One pound lots and less include postage. Larger lots at buyers expense.

Prices subject to change.

Osage Orange—A native from Texas, but has been generally introduced over the country from its extensive employment as a hedge plant. The best way to prepare the seed for planting is to soak in a running creek until it commences sprouting, then plant like any other seed. Another way to sprout it is by putting it in a vessel and covering it daily with warm water, until the sprouts come up. We prefer the first mentioned. Proper time to sow is in April or May.
